TRAP and TREAT Fats, Oils, Grease & Starches (FOGS) with Mechline's **BioCeptor™** ([view product page](#)) designed to prevent them from entering the drainage system.

- **Compliant with water regulations** when correctly specified and installed
- Highly efficient at capturing FOG, within the tank (F.I.T unit), with an average efficiency rating of 95.6%
- The sealed tank eliminates unwanted odours
- Independently tested and certified to **ASME A112.14.3** and **PDI-G101**
- Designed using flow control technology, allowing the tank to be much smaller than a standard interceptor
- The tank is simple to completely remove from situ to clean the surrounding area
- BioCeptor's dosing component, GreasePak, is the only **BBA** (British Board of Agrément) **approved** bioremediation dosing system on the market (certificate 11/4827)
- Reduced frequency of maintenance/ servicing due to the powerful bio-fluid degrading FOGS within the tank

STOP food waste going down the drain with Mechline's **Food Waste Strainer** ([view product page](#)) a unique sink strainer system with removable basket to easily and hygienically empty food waste into the bin.

For all your grease management equipment needs please contact FOGS@mechline.com
Mechline provide installation, commissioning and servicing through a service partner.
